

**AMENDMENTS TO THE SPECIFICATION:**

Please amend the specification as follows:

Please replace paragraphs [069] and [070] on page 17 of the specification with the following amended paragraphs:

A1

Fig. 32A is a transparent view of an additional optional embodiment of a flow restricting valve, as seen from the downstream side; <sup>1</sup>[[and]]

A2

Fig. 32B is a perspective view of the flow restricting valve of Fig. 32A, also as seen from the downstream side; and

Fig. 33 is a cross-section of another embodiment of a suction adapter.

Please add the following new paragraph after paragraph [087] and before paragraph [088] on page 26 of the specification:

A3

Another embodiment of a suction adapter is shown in Fig. 33. The suction adapter 700 includes a suction source port 710, a first device port 712, a second device port 714, and a third device port 716. The first device port 712 may be separated from the suction source port 710, second device port 714, and third device port 716 by a flow restricting valve 718. The third device port 712 may be separated from the suction source port 710, first device port 712, and third device port 716 by a flow restricting valve 720.
